

Corrections Victoria

2020-2021 Drugs in Victorian Prisons Report

November 2020

Report on Prohibited Drug Use and
Contraband Seized in Victorian Prisons

sho

The System Performance Branch produces the Drugs in Victorian Prisons Report (DIVPR) each month to provide data pertaining to drug use – both illicit use and prescription misuse – and contraband seizures in Victorian prisons. The report is provided on a monthly basis, and is made available to selected stakeholders, such as the Assistant Commissioner Security and Intelligence Division, Deputy Commissioner Custodial Operations, General Manager Security and Emergency Services Group, General Manager Corrections Victoria Intelligence Unit, and Prison General Managers.

The report is designed to provide information for consideration of action, including the deployment of resources to detect and reduce drugs in Victorian prisons.

The DIVPR specifically compiles and presents data in the following areas:

- drug test results for Random General and Targeted testing,
- types of drugs identified through drug testing,
- seizures of contraband from visitors¹ and prisoners

The first section of the DIVPR provides a statewide overview of the above data, with the second section providing location specific data. In a bid to include details of all drug test results from the preceding month, compilation does not commence until after the 15th day of the following month. Information is provided by Prison Intelligence Units (seizures), the Drug Strategy Support Team (drug metabolite breakdowns), as well as the Monitoring, Standards and Reporting Unit (Random General – SDO8 data).

As of February 2019, Corrections Victoria amended its data reporting so that Methamphetamines (ie ICE) was reported separately to Amphetamines (a broader drug group). However, Amphetamines are present in the majority of ICE positives due to the way the drug is manufactured and how it metabolises within the body. As such, the number of Amphetamine positives may be overrepresented.

After a successful trial, Corrections Victoria has implemented saliva testing in the women's prison system as part of its commitment to reducing the volume of strip searches conducted. Saliva testing has replaced most urine testing with an initial saliva test at the Dame Phyllis Frost Centre and Tarrengower Prison. Due to the need for confirmatory testing, any prisoner returning a positive result on a saliva test will be directed to complete a urine test. The saliva swabs are identical to those used by Victoria Police in roadside testing, but with additional testing for buprenorphine and methadone.

Due to the global COVID-19 pandemic, all personal visits to prisoners ceased from late March 2020. As a result, this no longer is an avenue for the introduction of contraband. However, we have seen an increase in the number of attempts by prisoners to introduce contraband through the mail and over the prison walls.

In addition, prisoners are currently required to be quarantined for 14 days upon reception into the prison system and are exempt from undertaking urinalysis testing during this time, for safety reasons.

¹ Contraband recorded in the 'Contraband Seizures: Visitors' section refers to any contraband found on visitors, sent to a prisoner by a visitor through mail or property, and may include contraband thrown over prison walls or via a drone.

Statewide Overview

Drug Test Results: 2020-2021

Random General Positive Rate

As at 16 December 2020, the number of Random General drug test samples collected in November was 890, of which 2.25% were positive. This is in comparison to the previous month, whereby 712 Random General tests were collected, of which 3.09% were positive.

- The following locations exceeded their Random General benchmark for the month of November 2020:
 - Melbourne Assessment Prison,
 - Loddon Prison, and
 - Beechworth Correctional Centre.
- The 2020-2021 Random General positive rate across all locations is 2.24%, with no locations exceeding their benchmark for the year.

Targeted Positive Rate

The number of Targeted drug tests collected in November was 1,224 of which 6.54% were positive.

This is in comparison to the previous month, whereby 1,362 Targeted drug tests were collected, of which 5.43% were positive.

- The following locations had the highest Targeted positive rates for the month of November 2020:
 - Fulham Correctional Centre,
 - Barwon Prison, and
 - Port Phillip Prison.
- The 2020-2021 Targeted positive rate across all locations is 5.85%, with the following locations having the highest Targeted positive rates for the year:
 - Karrenga, and
 - Hopkins Correctional Centre.

Targeted testing is used by intelligence officers to identify and intervene in use, and a high positive rate may therefore indicate well directed intelligence.

Note: The Commissioner defines a Random General positive as positives, refusals, and unables found guilty at a GMDH, as well as interfered and adulterated results. Random General data is provided by the Monitoring, Standards and Reporting Unit, with adjustments reflected in the following reporting month. November data provided 16 December 2020.

Targeted and Positive Results by Drug Type are retrieved from PIMS by the System Performance Branch. November data provided 16 December 2020.

Location Muster against Drug Tests Collected and % Positive

This data compares the number of Targeted and Random General tests collected and the percentage of the prison population tested for the month in comparison to the previous month.

It further provides the percentage of positives for both the Targeted and Random General urinalysis testing regimes.

² There has been an overall reduction in visitor contraband finds each month when can be directly related to the cessation of personal contact visits in prisons which was implemented in response to COVID-19. The November 2020 visitor finds relate to the seizure of contraband detected predominately in incoming prisoner mail or incoming prisoner property.
