Drugs in Victorian Prisons Report

March 2020

Report on Prohibited Drug Use and
Contraband Seized in Victorian Prisons

The System Performance Branch produces the Drugs in Victorian Prisons Report (DIVPR) each month to provide data pertaining to drug use – both illicit use and prescription misuse – and contraband seizures in Victorian prisons. The report is provided on a monthly basis, and is made available to selected stakeholders, such as the Assistant Commissioner Security and Intelligence Division, Deputy Commissioner Operations, General Manager Security and Emergency Services Group, General Manager Corrections Victoria Intelligence Unit, and Prison General Managers and Regional Directors. The report is designed to provide information for consideration of action, including the deployment of resources to detect and reduce drugs in Victorian prisons.

The DIVPR specifically compiles and presents data in the following areas:

- drug test results for Random General and Targeted testing,
- types of drugs identified through drug testing,
- seizures of contraband from visitors and prisoners

The first section of the DIVPR provides a statewide overview of the above data, with the second section providing location specific data. In a bid to include details of all drug test results from the preceding month, compilation does not commence until after the 15th day of the following month. Information is provided by Prison Intelligence Units (seizures), the Drug Strategy Support Team (drug metabolite breakdowns), as well as the Monitoring, Standards and Reporting Unit (Random General – SDO8 data).

There has been an amendment to the seizure category of "Syringes", which has been renamed to "Syringes & Needles", to capture needles modified for drug use.

As part of the commitment to reducing the volume of strip searches in the women's prisons, Corrections Victoria has implemented a 12-month trial of saliva testing, which commenced in March 2019. The trial has replaced the majority of urine testing with an initial saliva test at Dame Phyllis Frost Centre and Tarrengower Prison. Due to the need for confirmatory testing, any prisoner returning a positive result on a saliva swab will be directed to complete a urine test.

As of February 2019, Corrections Victoria amended its data reporting process relating to the types of drugs detected within the prison system to more efficiently report on Methamphetamines. Whilst the number of Methamphetamine positives is accurate, the number of Amphetamine positives may be over represented. This is due to Methamphetamine positives coming from the drug 'ICE' and Amphetamines also being present in the majority of these positives due to the way the drug is manufactured and how it metabolises within the body.

STATEWIDE OVERVIEW

Drug Test Results: 2019-2020

Random General Positive Rate

As at 28 April 2020, the number of Random General drug test samples collected in March was 1,067, of which 5.25% were positive.

This is in comparison to the previous month, whereby 869 Random General tests were collected, of which 5.41% were positive.

- The following locations exceeded their Random General benchmark for the month of March 2020:
 - Barwon Prison,
 - Karreenga,
 - Metropolitan Remand Centre,
 - Loddon Prison,
 - Port Phillip Prison, and
 - Ravenhall Correctional Centre.
- The 2019-2020 Random General positive rate across all locations is 4.89%, with the following locations exceeding their benchmark for the year:
 - Barwon Prison,
 - Loddon Prison, and
 - Metropolitan Remand Centre.

Targeted Positive Rate

The number of Targeted drug tests collected in March was 1,576 of which 11.17% were positive.

This is in comparison to the previous month, whereby 1,680 Targeted drug tests were collected, of which 10.30% were positive.

- The following locations had the highest Targeted positive rates for the month of March 2020:
 - Barwon Prison,
 - Hopkins Correctional Centre, and
 - Margoneet Correctional Centre.

The 2019-2020 Targeted positive rate for all locations 10.49%, with the following locations having the highest Targeted positive rates for the year:

- Barwon Prison,
- Hopkins Correctional Centre, and
- Metropolitan Remand Centre.

Targeted testing is used by intelligence officers to identify and intervene in use, and a high positive rate may therefore indicate well directed intelligence.

Note: The Commissioner defines a Random General positive as positives, refusals, and unables found guilty at a GMDH, as well as interfered and adulterated results. Random General data is provided by the Monitoring, Standards and Reporting Unit, with adjustments reflected in the following reporting month. March data provided 28 April 2020.

Targeted and Positive Results by Drug Type are retrieved from PIMS by the System Performance Branch. March data provided 28 April 2020.

Location Muster against Drug Tests Collected and % Positive

This data compares the number of Targeted and Random General tests collected and the percentage of the prison population tested for the month in comparison to the previous month.

It further provides the percentage of positives for both the Targeted and Random General urinalysis testing regimes.
