

Corrections Victoria

2018-2019 Drugs in Victorian Prisons Report

January 2019

Report on Prohibited Drug Use and
Contraband Seized in Victorian Prisons

The System Performance Branch produces the Drugs in Victorian Prisons Report (DIVPR) each month to provide data pertaining to drug use – both illicit use and prescription misuse - and contraband seizures in Victorian prisons. The report is provided on a monthly basis, and is made available to selected stakeholders, such as the Assistant Commissioner Security and Intelligence Division, Deputy Commissioner Operations, General Manager Security and Emergency Services Group, General Manager Corrections Victoria Intelligence Unit, and Prison General Managers and Regional Directors. The report is designed to provide information for consideration of action, including the deployment of resources to detect and reduce drugs in Victorian prisons.

The DIVPR specifically compiles and presents data in the following areas:

- urinalysis results for Random General and Targeted testing,
- types of drugs identified through urinalysis,
- seizures of contraband from visitors and prisoners,
- Ion Scanner readings (maximum security walk-through technology).

The first section of the DIVPR provides a statewide overview of the above data, with the second section providing location specific data. In a bid to include details of all urinalysis test results from the preceding month, compilation does not commence until after the 15th day of the following month. Information is provided by Prison Intelligence Units (seizures), the Drug Strategy Support Team (drug metabolite breakdowns), as well as the Monitoring, Reporting and Standards Unit (Random General – SDO8 data).

There has been an amendment to the seizure category of “Syringes”, which has been renamed to “Syringes & Needles”, to capture needles modified for drug use.

STATEWIDE OVERVIEW

Urinalysis Results: 2018-2019

Random General Positive Rate

As at 15 February 2019, the number of Random General urinalysis samples collected in January was 847, of which 4.44% were positive. This is in comparison to the previous month, whereby 1056 Random General tests were collected, of which 5.31% were positive.

- The following locations exceeded their Random General benchmark for the month of January 2019:
 - Metropolitan Remand Centre, and
 - Marngoneet Correctional Centre.
- The 2018-2019 Random General positive rate across all locations is 4.28%, with the following locations exceeding their benchmark for the year to date:
 - Karreenga,
 - Marngoneet Correctional Centre, and
 - Loddon Prison.

Targeted Positive Rate

The number of Targeted urinalysis tests collected in January was 1737 of which 10.01% were positive.

This is in comparison to the previous month, whereby 1,697 Targeted urinalysis tests were collected, of which 10.63% were positive.

- The following locations had the highest Targeted positive rates for the month of January 2019:
 - Hopkins Correctional Centre, and
 - Marngoneet Correctional Centre.
- The 2018-2019 Targeted positive rate for all locations is 10.20%, with the following locations having the highest Targeted positive rates for the year to date:
 - Barwon Prison, and
 - Marngoneet Correctional Centre.

Targeted testing is used by intelligence officers to identify and intervene in use, and a high positive rate may therefore indicate well directed intelligence.

Note: The Commissioner defines a Random General positive as positives, refusals, and unables found guilty at a GMDH, as well as interfered and adulterated results. Random General data is provided by the Monitoring, Standards and Reporting Unit, with adjustments reflected in the following reporting month. January data provided 15 February 2019.

Targeted and Positive Results by Drug Type are retrieved from PIMS by the Monitoring, Standards and Reporting Unit. January data retrieved 18 February 2019.

Location Muster against Urinalysis Tests Collected and % Positive

This data compares the number of Targeted and Random General tests collected and the percentage of the prison population tested for the month in comparison to the previous month.

It further provides the percentage of positives for both the Targeted and Random General urinalysis testing regimes.
